(54) HMD AND HMD SYSTEM

(57) Abstract:

PROBLEM TO BE SOLVED: To provide HMD which gives a wide activity range to a user.

SOLUTION: This system has a display 202 which displays video, a band 203 which is attachable to and detachable from a user and supports video displayed by the display means at a specific position where the user can view the video displayed by the display means, a reflecting plate 204 which is worn by the user and detect the wearing position from image data obtained by photographing the user, and an antenna 205 which receives the video with a radio signal.
